

**Creating & Collecting**

Develop your research question, plan your project, and gather data

**Processing**

Organize, structure, and clean your data

**Analyzing**

Discover patterns and compile results

**Publishing & Sharing**

Determine appropriate level of accessibility; locate publication and/or conference venues

**Archiving & Preserving**

Select a trusted digital repository to ensure long-term access to your research products

**Discovering & Re-Using**

Link your project to related scholarship; find and use existing research for your next project
